# MANAGEMENT DISCUSSION AND ANALYSIS REPORT

## 1. ECONOMIC OVERVIEW

The global macroeconomic landscape in FY2017 was uncertain, and was characterized by weak growth. Lacklustre performance in the beginning of the year was partially offset by improved momentum towards the end of 2016. Important global developments during the year included the US Federal Reserve increasing policy rates, partial recovery in global commodity prices and a revival in global trade flows. Developed economies witnessed tepid growth in 2016, in continuum with the trend of the past few years. At the other end of the spectrum, developing and emerging economies have gained in stature and importance in the recent years. Although the growth patterns in emerging economies are uneven, we can expect good growth in some of these economies at least for the medium term. And of course, the best performer in the squad continues to be India.

Global growth is projected to accelerate to 2.7 percent this year and further strengthen to 2.9 percent in 2018-19, in line with previous projections. However, the world economy continues to face a number of downside risks. They include increased protectionism, heightened policy uncertainty, the possibility of financial market turbulence, and, over the longer run, weaker potential growth. These risks highlight the urgency for policymakers in emerging market and developing economies to rebuild macroeconomic policy space and implement policies that support investment and trade

The global production of passenger cars and commercial vehicles has increased by 6% in 2016-17. There is moderate growth in automotive production in Europe, North America and Asia excluding India in 2016-17 as compared to last year.

Global Economic activity gained some momentum in the second half of 2016, especially in advanced economies. Growth picked up in the United States as firms grew more confident about future demand and inventories started contributing positively to growth (after five quarters of drag). Growth also remained solid in the United Kingdom, where spending proved resilient in the aftermath of the June 2016 referendum in favour of leaving the European Union (Brexit). Activity surprised on the upside in Japan thanks to strong net exports, as well as in euro area countries, such as Germany and Spain, as a result of strong domestic demand. Economic performance across emerging markets and developing economies has remained mixed. Whereas China's growth remained strong, reflecting continued policy support, activity has slowed in India because of the impact of the currency exchange initiative, as well as in Brazil, which has been mired in a deep recession. Activity remained weak in fuel and non-fuel commodity exporters more generally, while geopolitical factors held back growth in parts of the Middle East and Turkey. World growth, estimated as in the October 2016 World Economic Outlook at 3.1% in 2016, is projected to increase to 3.5% in 2017 and 3.6% in 2018 - an upward revision of 0.1 percentage point for 2017 relative to October. Together with the modest change in the forecast for the overall global growth rate, projections of the strength of economic activity across country groups have also shifted. Economic activity in advanced economies as a group is now forecast to grow by 2.0% in 2017 and 2018, 0.2 percentage point higher than expected in October 2016. Growth in the group of emerging market and developing economies is forecast to rise to 4.5% and 4.8%, respectively, in 2017 and 2018, from an estimated outturn of 4.1% in 2016.

According to the International Monetary Fund (IMF), the global economy activity is picked up with a long awaited cyclical recovery in investment, manufacturing and trade. It has projected economic activities to improve in both advanced economies as well as EMDEs in CY2017 and CY2018, with global projections at 3.5% and 3.6% respectively.

**Fig. 1 IMF's World Economic Outlook (Update)**

The global steel prices started recovering in 1Q CY 2016 with

- a) Broad-basing of trade remedial actions across other countries, which started in CY 2015;
- b) Sudden spike in iron ore prices in March 2016 beginning;
- c) Tightness in physical markets in China ahead of enforced production cuts during the international horticultural exposition;
- d) Re-stocking demand led by infrastructure and construction sectors in China with Chinese Government's thrust on stimulus.

This rise in global steel prices in March-April 2016 drove a sharp increase in steel production in all major regions during 2Q CY 2016 (except Europe and South America). Global steel capacity utilisation in June 2016 jumped to 71.8%.

The countries with export focused steel industry like China, Japan, Korea and Russia continued to flood global steel markets with exports at predatory prices. The Japanese and Korean export prices remained at a discount, compared to the respective domestic market prices. With surge in production not being supported by underlying demand, steel prices started declining towards the end of 2Q CY 2016. However, with a sharp surge in coking coal prices from August-September 2016 on the back of tightness in physical markets, steel prices again moved up, reflecting a movement in raw material prices. The steel prices continued to firm up until March 2017 with 1Q CY 2017 coking coal contract price settling at USD 285/t and jump in seaborne iron ore prices.

Domestic Economic activity has been losing momentum since second half of 2015-16 on a combination of structural and cyclical factors. On a year-on-year basis, this trajectory was dented further by the transient impact of demonetisation. Both private and government consumption demand have held up well against this slowdown, together accounting for 90% of real gross domestic product (GDP) growth in second half of 2016-17 on a weighted contribution basis. Investment demand, which had sunk into contraction in first-half, recovered from third quarter of 2016-17. Net exports have been growing strongly since third quarter of 2015-16. The same however turned negative with imports starting to expand at a higher pace than exports as domestic demand strengthened. Headline inflation fell off its July cliff and was already traversing a declining trajectory during August to October when demonetisation hit in November. This took inflation down to 3.2%, the lowest in the history of India. In February, however, the drag from these transitory effects began to ebb and headline inflation edged up on a pickup in food and fuel price pressures. With the effects of demonetisation turning out to be short-lived and modest, discretionary consumer spending held back by demonetisation is expected to have picked up from Q4:2016-17 and will gather momentum over several quarters ahead. The recovery will also likely be aided by the reduction in banks' lending rates due to large inflows of current and savings accounts ("CASA") deposits, although the fuller transmission impact might be impeded by stressed balance sheets of banks and the tepid demand for bank credit. The ebullient rebound in agricultural

activity on the back of normal monsoon and record food grains production have boosted rural incomes and supported consumption. In contrast, the modest pick-up in industry in second half of 2016-17 and the slower growth in services suggests that investment demand is still sluggish.

Indian economy successfully navigated through the external global turbulence and the temporary negative impact of demonetization to register a growth of 7.1% in FY 2017. According to the Economic Survey 2016-17, India's real GDP growth is projected at 7.1% for 2017, and could remain in the range of 6.75-7.5% in 2018. This posits India as one of the fastest growing economies amidst an environment of global economic uncertainty. The decline in consumption due to demonetization along with slowdown in the industrial sector resulted in moderated growth rate towards the end of 2017. However, the agriculture sector showcased enhanced performance, owing to a favourable monsoon after two consecutive droughts.

**From the Economic Survey 2016-2017** Ministry of Finance, Against the backdrop of robust macro-economic stability, the year was marked by two major domestic policy developments, the passage of the Constitutional amendment, paving the way for implementing the transformational Goods and Services Tax (GST), and the action to demonetise the two highest denomination notes. The GST will create a common Indian market, improve tax compliance and governance, and boost investment and growth; it is also a bold new experiment in the governance of India's cooperative federalism. Demonetisation has had short-term costs but holds the potential for longterm benefits. Follow-up actions to minimize the costs and maximise the benefits include: fast, demand-driven, remonetisation; further tax reforms, including bringing land and real estate into the GST, reducing tax rates and stamp duties; and acting to allay anxieties about over-zealous tax administration. These actions would allow growth to return to trend in 2017-18, following a temporary decline in 2016-17.

Economic growth of around 7.2% makes India the fastest-growing G20 economy. The acceleration of structural reforms, the move towards a rule-based policy framework and low commodity prices has provided a strong growth impetus. Recent deregulation measures and efforts to improve the ease of doing business have boosted foreign investment. According to Department of Industrial Policy and Promotion (DIPP), the total FDI investments India received during April 2016-March 2017 rose 8 per cent year-on-year to US\$ 60.08 billion, indicating that government's effort to improve ease of doing business and relaxation in FDI norms is yielding results.

The foreign exchange reserves has reached an all time high to US\$393 billion in August 2017 and is likely to cross US\$400 billion by September. The pace of forex accretion has been the strongest since 2015 and this has also been one of the strongest in Asia ex-Japan in the past 12 months.

India's economic growth is gradually improving since 2014. The favourable policies as well as executive reforms by the Government to support strong and sustainable growth, prudent fiscal regime and calibrated monetary easing that reigned in inflation have helped to strengthen macroeconomic stability. The lower crude oil prices have also helped to reduce current account deficit, improve fiscal positions, and lower inflation. This, in turn, has helped boost economic activities in India. Driven by these positive developments, the country has emerged as the world's fastest growing major economy.

The growth momentum should rise, driven by the Government's policy initiatives in areas such as taxation (GST), foreign direct investment (FDI), and the ease of doing business, among others. Other major factors helping India stay as a bright spot in the global economic landscape include the lower global oil price, with positive impact on the country's import bill, a well-regulated monetary policy by the Reserve Bank to stabilise prices, and improving fiscal condition. The Government's endeavour to drive a bigger as well as a cleaner GDP is expected to augur well for the economy in the medium and long terms.

## **2. INDUSTRY OVERVIEW**

### **2.1 Steel**

#### ***Global Sector:***

As per the World Steel Association ('WSA'), global steel demand is expected to grow at 1.3% in 2017 to 1.54 billion tonnes and a further 0.9% in 2018 to 1.55 billion tonnes. Recovery in developed economies and accelerating growth in emerging and developing markets especially

Russia, Brazil and India is expected to aid demand growth and keep inventory levels low which in turn is expected to support global steel prices. However, low level of capacity reduction than targeted by nations and continued oversupply in raw materials especially iron ore are likely to weigh down on the prices in the absence of effective trade measures and/or increase in steel demand. India's prospects continue to remain bright albeit with few short-term headwinds in the form of imports and surplus capacity. Proactive policy measures by the Government are expected to address most of these concerns. Taking a cue from a resurging global economy and a weak yen, Japan's steel demand is also expected to recover in a stable manner. While Europe is still at the cusp of a political turnaround, positive developments are expected with the current monetary policy. Some stability in the region is bound to garner future investments. China's economy is expected to see managed growth deceleration and restriction by more than 20 cities on property market since March 2017 point to lower steel demand going forward. WSA has also forecasted only a flat demand scenario in China in CY2017. China's steel demand which accounts for 45% of global steel demand is expected to be flat this year at 681 million tonnes while falling by 2% to 667 million tonnes in 2018. However, as per WSA, steel demand in emerging and developing economies excluding China is expected to grow at 4-5% per annum in the next two years to 475 million tonnes. In addition, the advanced economies are expected to grow at 1% for the next two years. Emerging countries of the world contribute to 30% of the total global steel demand. Except for the possible currency volatility risk dependent on the US dollar, the ASEAN nations are expected to throw a solid growth year. A stabilising trend is evident in BRICS nations such as Russia and Brazil, which are likely to put forth modest growth figures. India is also expected to grow encouragingly, even though growth will be marginally stunted due to demonetisation.

### ***Indian Sector:***

During the year, India's steel sector was impacted by intense competitive pressure with a surge in domestic steel production and elevated level of steel imports at predatory pricing. In FY2016-17, India's crude steel production grew by 8.5% y-o-y to 97.4 million tonnes. India imposed 'Minimum Import Price' (MIP) in Feb 2016 on various iron and steel products, after seeing that the provisional safeguard duty of hot rolled sheet failed to have a desirable impact on unbridled and unfair flow of steel imports into the country. This was an emergency provision, which provided some relief to the industry.

Later on the Government imposed provisional anti-dumping duty on hot rolled and cold roll products in August 2016; wire rods in November 2016; and colour coated rods in January 2017 as the industry needed adequate, swifter and longer shelf-life trade remedial measures to check unbridled and unfair steel imports. India also notified final safeguard duty on hot rolled sheets and plates in November 2016. However, steel imports remained at around 8 million tonnes on an annualised basis, despite these trade remedial measures. The domestic steel industry suspects circumvention of these trade remedial measures. Therefore, a stringent monitoring mechanism is required.

The situation was further aggravated by the fact that the apparent finished steel consumption in the country grew by just 2.6% y-o-y for the same period. India's steel demand was expected to gather momentum in the second half of FY2016-17, driven by the Government's measures to drive the economy and manage quantifiable progress on various policy reforms. Normal monsoon and the Seventh Pay Commission announcements were also likely to drive consumer discretionary spending. However, the steel demand did not see the desirable upswing in the second half of the year, amid poor liquidity, following the Government's demonetisation initiative. This led to a liquidity crunch and a contraction of the major consuming sectors such as real estate. In May 2016, the Government removed the differential railway freight for the transportation of iron ore and pellets for domestic use and exports. The reform gave the much-needed boost to iron ore exports. Such a move may not augur well for steel producers, as it does not differentiate between quality of products. Various trade measures were put in place by the Government in 2016. Anti-dumping duties on China, the United States and other countries proved to be a significant relief for domestic steel producers. A Minimum Import Price (MIP) imposed on certain steel imports in February last year for a period of six months was later extended. This restricted low-priced steel imports into India

to a very large extent. Safeguard duty is another measure adopted by the Government. The Government defended its move at the WTO by asserting that the introduction of such a measure was imminent, and that the MIP would be phased out eventually.

### ***Advantage India***

#### **National Steel Policy 2017 (NSP):**

The National Steel Policy (NSP) 2017, released by the Government, aims to increase steel production. Its objective is to make India self-sufficient in steel production and projects crude steel capacity of 300 million tonnes (mt) and per capita consumption of 160kg of finished steel by 2030-31. As a part of its focus area, the policy aims to address adequate local manufacturing to meet the demand for high-grade automotive steel, electrical steel, special steels and alloys for strategic applications by the same year.

#### ***The NSP has nine core elements to it. These are the following:***

1. 300 MnT steel-making capacity by 2030
2. 160 per capita steel consumption by 2030
3. Preference for domestically produced steel in Government procurement
4. Export 24 MnT steel (10% of production) by 2030
5. Reduction of imports to nil by 2030
6. Domestically produce value added steel-CRGO, special steel, and alloys
7. Reduce import dependence on coking coal to 65% by 2030-31
8. Focus on pelletisation and installation of slurry pipelines and conveyors
9. Emphasis on BF/BOF technology

## **2.2 Automotive**

### ***Global Sector:***

Based on strong growth in production and sales of automobiles in the first quarter of 2017 in most of the key regions around world, there is optimism that this year will see continued gains for the global automotive industry.

The Western European car market ended the first quarter up more than 7% on the same period in 2016, recording 3.9 million new registrations. All of the five largest individual markets expanded, with Italy enjoying the strongest growth at 18%. Double digit growth was also recorded in Spain (+13%) and Germany (+11%), with the United Kingdom up 8% and France 7%. Total light vehicle production in the EU was up 3% to 5,016 million units in the first quarter of 2017. USA and Canada saw declines in vehicle production with the US slipping by 1.9% to 3,017 million and Canada down 4.5% to 601,443.

In the Asia-Pacific region, sales for the first quarter were 6.9%, ahead of the same period in 2016, with 11.37 million units or 47.5% of the global market. China performed strongly again in the first quarter with production and sales of passenger cars rising to 7.133 million and 7,002 million respectively, representing increases of 8% and 7% year-on-year. Japan reported a healthy increase of 7.9% in passenger car production in the first quarter to reach 2,200 million units; with total vehicle production, including trucks and buses, up 6.5% to 2,545 million.

Vehicle sales in Japan increased, by almost 8% in the quarter to March, reaching over 1.3 million. In India, sales of passenger cars were up 11%, when compared with the same period last year, at 803,200 vehicles. In the reporting period April 2016–March 2017 production of passenger cars and commercial vehicles in India increased by 5.8% to 4,502 million of which 3,791 million were cars.

The IMF expects the global economy to grow by 3.4% in 2017 and by 3.6% in 2018. The outlook for emerging market economies is expected to improve; however, capital flow volatility will remain a concern as markets adjust to the higher US interest rate environment, likely capital revival in emerging market countries, and capital outflows in China. This is expected to be accompanied by the projected policy impetus of the new US administration and its global consequences.

The Company considers human resources as its most important asset. It is the invaluable contribution of the Company's large and energetic team that has primarily resulted in strength in the industry. The Company has implemented various initiatives to create a worker-friendly organization that motivates its employees and improves performance.

**Indian Sector:**

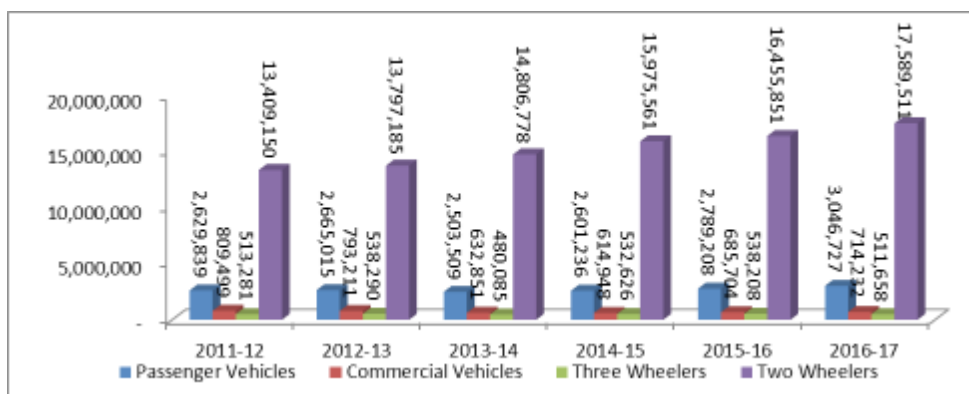

The Indian auto industry is one of the largest in the world. The industry accounts for 7.1% of the country's Gross Domestic Product (GDP). The Two Wheelers segment with March 2017 over the corresponding period of last year. The Indian automotive industry is showing positive signs with moderate growth in the passenger vehicle and two wheeler segments. During the year, OEMs launched new models with additional functionalities and features to attract customers. Performance of Indian auto industry during last three years is as follows:-

**Fig. 2 Automotive Production Trends**

India is also a prominent auto exporter and has strong export growth expectations for the near future. In April-March 2017, overall automobile exports grew by 1.91 per cent. PV, Commercial Vehicles, and Two Wheelers registered a growth of 9.17 per cent, 3.03 per cent, and 8.29 per cent respectively during first quarter of 2017. In addition, several initiatives by the Government of India and the major automobile players in the India market are expected to make India a leader in the Two Wheeler and Four Wheeler market in the world by 2020.

The government aims to develop India as a global manufacturing as well as a research and development (R&D) hub. It has set up National Automotive Testing and R&D Infrastructure Project (NATRIP) centres as well as a National Automotive Board to act as facilitator between the government and the industry.

**Fig. 3 Domestic Sales Trends**

Alternative fuel has the potential to provide for the country's energy demand in the auto sector as the CNG distribution network in India is expected to rise to 250 cities in 2018 from 125 cities in 2014. Also, the luxury car market could register high growth and is expected to reach 150,000 units by 2020.

India is the world's fourth largest energy consumer. The country's oil consumption is expected to rise manifold over the next decade to cater the demands of a growing economy. India plans to reduce its dependence on imports and achieve at least a 10% reduction in energy imports by FY 2022. For this, it is increasing investments in oil and gas exploration, developing discovered oil and gas reserves, enhancing production from existing fields, and tapping unconventional resources like shale gas, etc. Oil exploration and production spend in the country has doubled in the last 5 years and the same is expected to be robust in the near future.

The auto-components industry accounts for almost 7 per cent of India's Gross Domestic Product (GDP) and employs as many as 19 million people, both directly and indirectly. A stable government framework, increased purchasing power, large domestic market, and an ever increasing development in infrastructure have made India a favourable destination for investment.

### **3. BUSINESS OVERVIEW**

#### **3.1 Steel**

##### ***Rolling Mill:***

##### ***Rajasthan***

The Company has established a cold rolling facility, located in Rajasthan, which is equipped with an imported 3-station cold rolling mill and a straightening and cutting machine. The plant's input is in the shape of round wire rods and output is in the form of profile sections. This facility includes in-house laboratory for complete mechanical and chemical analysis of incoming steel. The operations team is trained in Korea for the operation of the mill. The market segment catered to by the facility also includes the automotive component industry.

##### ***Keonjhar***

The rolling mill of the Company at Keonjhar is strategically located in close vicinity of various catchment areas like Bhubneswar, Rourkela, Jamsedpur, Ranchi & Kolkata. The main product is finished steel like TMT bars, rods, bars, etc. is mainly construction steel and is used for reinforced concrete work extensively in civil construction. This gets sold in the commodity market generally for building construction to individuals/builders and bulk sale for Project Application, Infrastructure.

### 3.2 Automotive

#### **Ferrous Foundry:**

To meet the future demand of quality iron castings, OISL has set up a casting manufacturing unit in Rajasthan. The project has been commissioned on a land parcel in the RIICO Industrial Area, Rajasthan. The manufacturing facility is fully automated and has state-of-the-art technology and machinery.

Technical knowhow is being supported by Kunkel Wagner Germany, Inductotherm India Private Limited, Disa India Limited, Suzhou Foundry-China, Siemens and other companies of international repute. The end products are primarily used in the manufacturing of tractors, construction equipment, commercial vehicles and passenger vehicles. Key products include axle casing, trumpet, swivel hub, axle arm, planetary carrier, axle housing, GB housing, crankcase, brackets and trunnion bracket.

#### **Machining:**

OISL's machining plant in Haryana manufactures EMD crankcase and Alco engine blocks . The plant operates using the lean manufacturing principles. Major customers include EMD, ALCO, Diesel Locomotives Works (DLW), Diesel Modernization Workshop (DMW) and NREC, USA.

The facility, which is also equipped for fabrication, is one of the few vertically integrated machining plants. It is state of the art facility with a high level of technological orientation including the use of electromotive diesel technologies of the US. The Company is one of the few who are eligible to manufacture electromotive diesel crankcases.

## 4. SWOT ANALYSIS

### 4.1 Steel

<b>Strengths and Opportunities</b>	<b>Threats &amp; Weaknesses</b>
<p>The biggest opportunity for the Indian steel sector is the increasing consumption of steel across many sectors in India. The Indian rural market is still largely unexplored and untapped. Per capital steel consumption still remains low i.e. 63 kg.</p>	<p>Key strategic considerations include the macro environment in which the Company operates, global steel industry dynamics, growth projects and competitiveness of operations. Current overcapacity in global steel markets continues to impact steel prices. The Company went for careful Cost Cutting measures till the steel price recovery was in sight and then planned to scale up production.</p>
<p>It is also estimated that world steel consumption will double in the next 25 years. Quality improvement of Indian steel, combined with its low cost advantage, will enable the industry to strengthen its position in the export markets.</p>	<p>Operational risks include supply chain, employee productivity, health and safety of employees and environmental impact. Additional risks which can impact the Company's reputation cover labour relations, product mix, innovations and effective deployment of technology. The Company has in place a crisis management plan and is committed to servicing customers and stakeholders effectively. A key operational factor is the supply chain of raw materials and the costs associated with it. Supply chain disruptions could increase operating costs as raw material accounts for 65-75% of the cost of steel; disruptions in supply and volatility in the prices of raw materials present a significant risk. The Company closely monitors the developments in supply chain and takes effective steps to mitigate such risks.</p>

<p>India also benefits from its abundance of iron ore, coal and many other raw materials required for iron and steel making. It has the fourth largest iron ore reserves (10.3 billion tonnes) after Russia, Brazil and Australia. This scale allows for raw technical manpower capable of understanding and assimilating new technologies. The Indian steel industry is known for its relatively low unit labour cost, commensurate with the skill levels.</p>	<p>Financial risks refer to the ability of the Company to meet financial obligations and lessen the impact of various factors such as changes in interest rates and, foreign currency exchange rates. The Company has significant level of indebtedness and in an adverse environment, the availability of cash for capital expenditure and acquisitions may be reduced. In addition it could impact the ability to increase funds for working capital, to raise new debt or to refinance existing debt on favourable terms.</p>
<p>There has been a moderate growth in Steel production with the recovery in steel production and consumption in China Medium term steel outlook is strong and stable.</p>	<p>These risks include the outcome of legal proceedings and Government action and/or regulatory action which could result in additional costs. The Company is subject to various laws, regulations and contractual commitments. The risk of substantial costs, liabilities and damage to reputation related to non-compliance of these laws and regulations are inherent to the Company's business. The Company has policies, systems and procedures in place aimed at ensuring substantial compliance and there is a strong commitment from the management to enforce compliance.</p>
	<p>Products produced by OISL are exported to a number of different markets globally. This exposes the Company to various risks associated with international business transactions. These include various geopolitical risks, currency price regulatory risks and other such concerns.</p>

## 4.2 Automotive

<b>Strengths and Opportunities</b>	<b>Threats &amp; Weaknesses</b>
<p>Geographical spread of operations in India allows proximity to a large and diversified customer base.</p>	<p>Automotive operations are directly dependent on general economic conditions across key global markets.</p>
<p>Proximity to all major OEM's coupled with consistent track record of deliveries manifested by their increased levels of localisation in India</p>	<p>The liquidity continues to remain under stress coupled with availability of fresh working capital funds being a major challenge has led to low capacity utilisations thereby impacting profitability.</p>
<p>State-of-art in-house tool design and 3D modelling/ simulation software with key machines such as CNC, VMC etc.</p>	<p>Political instability, wars, terrorism, multinational conflicts, natural disasters, fuel shortages and their prices all present business risk.</p>
<p>Trusted partner and strategic Tier I supplier to leading OEMs. It has well established strategic relationships most OEMs across the country and abroad.</p>	<p>Due to global integration of automobile supply chains the industry has become highly competitive with OEM's continuously scanning the market for lower prices and better terms.</p>

Well positioned to cater to growing demand of automobile industry in India coupled with a large scale of operations allowing economies of scale.	Changing technologies have led to shortening of life cycles of new vehicles.
Skilled, experienced and diversified workforce with proven credentials.	Imposition of additional taxes and levies designed to limit use of automobiles could adversely affect demand.
Strong economic growth in India and other growth markets like China, Southeast Asia and North Africa - resultant demand for Automobiles.	Presence of large number of players in the automobile industry has resulted in extensive competition thus enhancing scope for eating into share of business of other players.
Indian Government's focus on improving ease of doing business with its "Make in India" initiative to transform India into a global manufacturing hub, an advantage for our Company	
GOI's emphasis on substitution of imported goods sectors such as railways and defence are expected to turn towards Indian Companies for procurement.	
Diversification towards forward integration.	
Strategic alliances and partnering could be a smart strategy resulting in specialised capabilities differential offerings.	

## 5. STRATEGY & OUTLOOK

Liquidity constraint, which arose due to unfavorable market conditions in the markets globally, is continuing and has affected the Company's performance. This has resulted in the Company not being able to meet its commitments to its lenders as also non availability of adequate working capital funds. Due to scarcity of adequate working capital facilities, the Company could not operate its facilities at optimum capacity utilization and hence would take advantage of improved future market conditions.

To rectify the situation, the Company has approached its lenders for **restructuring of its debt** and sanction of additional working capital facilities, which is expected to be approved in the near future. Once approved, the Company's operations are likely to improve substantially. This, coupled with the expected commencement of mining operations of captive mines, will improve the Company's performance substantially in the times to come and all stakeholders can look forward to vastly profitable operations.

### 5.1 Steel Business

#### **Raw Materials**

To attain Raw Material security for the plant in long run the focus has been in:

- To commence the operations of the captive coal block of Ardhamgram, allocated through the auction of coal blocks to OISL. This will provide quality coal for sponge making and power generation on a sustained basis. This is at a final stage of release of lease order from the Government of West Bengal
- To obtain Stage II clearances for starting the Kundaposi captive ore mines in order to be self-reliant in the supply of key raw materials to the plant. This will ensure uninterrupted supply of high grade iron ore to the plant.

## **Plant Operations**

- In view of demand shrinkage and drop in price the operation of new units were suspended. However, the feel good factor in steel with a robust recovery was visible in the 4<sup>th</sup> quarter of 2016.
- The unit moved ahead to commence operation of its new units i.e. DRI (2 X 350 TPD) and Power Plant (2 X 35 MW) in order to upscale production and revenue.
- With higher waste heat generation and power availability, billet production in the steel melting shop shall be enhanced and the customer base as a quality supplier of billets shall be expanded. As an outcome it will enhance the already existing strong OISL brand image in this product segment.

The senior management team remains fully committed to implementing these strategies which in turn will allow the Company to achieve sustainable growth and strengthen its position in the market place.

## **5.2 Automotive Business**

The company is able to engage with customers from the early stages of development projects which enable the company to introduce company's products into a vehicle's designs phase. This when combined with close proximity to customers, technological leadership, demonstrated reliability and financial stability will result into winning orders but at a new global upcoming platform. The company is one of the few suppliers in its product segment with a global engineering and manufacturing footprint and this strong diversification enables the company to capitalize on global growth opportunities while mitigating the impact of any regional demand fluctuations.

The company has realised that cyclical demand coupled with a leveraged balance sheet can lead the Company to a vicious cycle which eventually leads to stagnation. Keeping this in mind, we have constantly emphasized on de-risking our business by entering new sectors thereby adding breadth to our customer profile.

The Company's in-house R&D team focus is to commit to work on various projects including developing technologies to minimize carbon footprint and manufacture light weight products that result in lower energy consumption. Innovation is an on-going process which has helped us explore new ideas and deliver transformative solutions. The Company's strategy is based on the principle that creating value for its customers and gaining their trust requires consistent outstanding performance and a broad product portfolio, continuously upgraded through technical and process innovations. The Company is poised to play a meaningful role in this Make in India mission, with indigenously focus to develop cutting-edge technologies and innovations. The key strategy is on developing new processes, expanding the product portfolio & product mix, and leveraging on our innovation capabilities to open more growth avenues.

Regular product launches planned by OEMs will keep customer excitement levels up and create demand for us which is favourable for the overall industry growth. The Company, in spite of the challenges, is well positioned to benefit from the globalisation of the sector as exports potential is harnessed to achieve the above. Technological advancement and product innovation remain our key differentiators. The Company's in-house R&D team has been committed to work on various projects including developing technologies to minimize carbon footprint and manufacture light weight products that result in lower energy consumption. Innovation is an on-going process which has helped us explore new ideas and deliver transformative solutions. Transformation of a nation or a company cannot sustain without wholehearted people participation. The capabilities of our people have brought us this far, and we will continue to invest in developing our teams to enhance their efficiency and introduce industry-leading practices. With strong focus on developing skills and capabilities of our employees.

The forward integration strategy of the Company is to move in fully machined & assembled supply of auto components for its customers. The Company has demonstrated sound technology absorption capabilities, translating into a shortened learning curve and stronger proprietary knowledge management. Moving ahead, we are graduating to the next level and charting our next course of growth. The company is investing in tomorrow's technologies to further hone our innovative drive and thereby lead change. Being a value-accretive and solutions-driven Company, we are

constantly fine-tuning our growth strategies and leveraging our intrinsic strengths to create and deliver incremental value to our stakeholders.

## **6. INTERNAL CONTROL SYSTEMS AND THEIR ADEQUACY**

The Company has an internal control system which monitors compliance to internal processes. It ensures that all transactions are authorised, recorded and reported correctly. The systems are routinely tested and certified by Statutory as well as Internal Auditors and cover all offices, plant facilities and key areas of business. The Internal Auditors independently evaluate the adequacy of internal controls and concurrently audit the majority of the transactions in value terms.

To further strengthen the internal control process, the Risk Management Committee has documented control procedures covering all aspects of key financial and operating functions. The Company's internal control systems provide for:

- Adherence to applicable accounting standards and policies
- Accurate recording of transactions with internal checks, prompt reporting and timely action
- Compliance with applicable statutes, policies, listing requirements and management policies and procedures
- Review of capital investments and long term business plans
- Periodic review meetings to guide optimum utilization of resources
- Effective use of resources and safeguarding of assets

The Audit Committee reviews the effectiveness of internal control systems, and also provides timely updates on operating effectiveness and controls to senior management team. A CEO and CFO Certificate,

forming part of the Corporate Governance Report, reinforces the effectiveness of internal controls and reiterate their responsibilities to report deficiencies to the Audit Committee and rectify any issues.

The auditors carry out periodic audits as per an agreed internal audit programme. They bring to the notice of management, issues which require their attention and also highlight the severity of the issue. Corrective actions are then set in place. The internal auditors report is reviewed by the Audit Committee and placed before the Board of Directors for their consideration

## **7. FINANCIAL OVERVIEW**

During the period under review, the Company's revenue stood at Rs. 30,857.29 Lakhs compared to Rs. 39,907.51 Lakhs in the previous year. EBITDA stood at Rs. (5,910.98) Lakhs as compared to Rs. (568.34) Lakhs in previous year.

The decline in turnover is mainly due to lower capacity utilization as a result of subdued market conditions, and to falling steel prices as a result of the global slowdown. Lower sales, coupled with the effect of fixed costs and a high interest burden, had an adverse impact on profitability.

The capital employed in the business stood at Rs. 1,38,073.72 Lakhs as on 31st March, 2017 as compared to Rs. 1,58,172.08 Lakhs as on 31st March, 2016.

The authorized share capital of the Company as at 31st March 2017 stood at Rs. 10,400 Lakhs divided into 3,400 Lakhs equity shares of Rs. 1/- each and 700 Lakhs Preference shares of Rs. 10/- each.

During the year under review, there was no change in the authorised and paid up capital of the Company. As at 31st March, 2017 the reserves and surplus of the Company stood at Rs. 10,313.97 Lakhs and the net worth stood at Rs. 11,655.40 Lakhs

## **8. DEBT POSITION**

As of 31st March 2017, the Company had a total debt of Rs. 1,30,742.95 Lakhs. This includes long term debt including current maturities of Rs. 126,418.32 Lakhs and short term debt of Rs. 4,324.63 Lakhs.

## **9. HUMAN RESOURCES AND INDUSTRIAL RELATIONS**

During the year, the Company delivered value to its customers and investors. This was made possible by the relentless efforts of each and every employee. The Company has developed a robust and diverse talent pipeline which enhances OISL's organizational capabilities for future readiness, further driving greater employee engagement. Our human resource program is focused on attracting the right talent, providing excellent on the job training opportunities, and finally giving them the growth opportunities consistent with their aspirations. In addition, the trust our employees place in us is evident in our ability to retain key employees and senior executives during a challenging FY2017.

OISL has always enjoyed strong industrial relations. The company has a systematic grievance redressal system to further strengthen these relationships. This system encourages employees to share their views and opinion with the management. The Company reflects on this feedback and incorporates relevant changes into the existing policies, systems and processes.

During the period under review, the Company maintained a cordial relationship with its workforce. The Directors would like to place on record their appreciation and recognition towards all its employees who continue to exude confidence and commitment toward the Company

## **10. STATUTORY COMPLIANCE**

The Managing Director makes a declaration to the Board of Directors every quarter regarding compliance with provisions of various statutes as applicable. The Company Secretary ensures compliance with the Companies Act, SEBI regulations and provisions of the Securities and Exchange Board of India (Listing Obligations and Disclosure Requirements) Regulations, 2015 and compliance with the guidelines on insider trading for prevention of the same.

## **11. CAUTION STATEMENT**

The above mentioned statements are only 'forward looking statements' based on certain assumptions and expectations. The Company's actual performance could differ materially from those expressed/ projected depending upon changes in various factors. The Company does not assume any responsibility to any change(s) in forward looking statements', on the basis of subsequent developments, information or events etc.

Important developments that could affect the Company's operations include a downward trend in the domestic automotive industry, competition, rise in input costs, exchange rate fluctuations, and significant changes in the political and economic environment in India, environmental standards, tax laws, litigation and labour relations.

## **Independent Auditor's Report**

### **To the Members of OCL Iron and Steel Limited**

#### **Report on the Standalone Ind AS Financial Statements**

We have audited the accompanying standalone Ind AS financial statements of OCL Iron and Steel Limited ('The Company'), which comprises the Balance Sheet as at 31<sup>st</sup> March 2017, the statement of Profit and Loss (including other comprehensive income), the statement of Change in Equity and the statement of Cash Flow for the year then ended, and a summary of the significant accounting policies and other explanatory information.

#### **Management's Responsibility for the Financial Statements**

The company's board of directors is responsible for the matters specified in section 134(5) of the Companies Act, 2013 ("the Act") with respect to the preparation of these Ind AS financial statements that give a true and fair view of the financial position, financial performance including other comprehensive income, change in equity and cash flows of the company in accordance with the accounting principles generally accepted in India, including the Indian accounting standards (Ind AS) prescribed under section 133 of the Act, read with relevant rules issued there under.

This responsibility also includes the maintenance of adequate accounting records in accordance with the provisions of the Act for safeguarding of the assets of the company and for preventing and detecting the frauds and other irregularities; selection and application of appropriate accounting policies; making judgments and estimates that are reasonable and prudent; and design, implementation and maintenance of adequate internal financial control, that were operating effectively for ensuring the accuracy and completeness of the accounting records, relevant to the preparation and presentation of the standalone Ind AS financial statements that give a true and fair view and are free from material misstatement, whether due to fraud or error.

#### **Auditor's Responsibility**

Our responsibility is to express an opinion on these standalone financial statements based on our audit.

In conducting our audit, we have taken into account the provisions of the Act, the accounting and auditing standards and matters which are required to be included in the audit report under the provisions of the Act and the Rules made thereunder.

We conducted our audit of the standalone Ind AS financial statements in accordance with the Standards on Auditing specified under Section 143(10) of the Act. Those Standards require that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance about whether the standalone Ind AS financial statements are free from material misstatements.

An audit involves performing procedures to obtain audit evidence about the amounts and the disclosures in the standalone Ind AS financial statements. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement of the standalone Ind AS financial statements, whether due to fraud or error. In making those risk assessments, the auditor considers internal financial control relevant to the company's preparation of the standalone Ind AS financial statements that give a true and fair view in order to design audit procedures that are appropriate in the circumstances. An audit also includes evaluating the appropriateness of the accounting policies used and the reasonableness of the accounting estimates made by the company's directors, as well as evaluating the overall presentation of the standalone Ind AS financial statements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion on the standalone Ind AS financial statements.

#### **Opinion**

In our opinion and to the best of our information and according to the explanations given to us, the aforesaid standalone Ind AS financial statements, give the information required by the Act in the manner so required and give a true and fair view in conformity with the accounting principles generally accepted in India, of the state of affairs of the company as at March 31, 2017 and its loss, total comprehensive income, the change in equity and its cash flows for the year ended on that date.

## **Annexure - B to the Independent Auditors' Report**

### **Report on the Internal Financial Controls Over Financial Reporting under Clause (i) of Sub-section 3 of Section 143 of the Companies Act, 2013 ("the Act")**

We have audited the internal financial controls over financial reporting of OCL Iron and Steel Limited ("the Company") as of 31st March 2017 in conjunction with our audit of the standalone Ind AS financial statements of the company for the year ended on that date.

#### **Management's Responsibility for Internal Financial Controls**

The company's management is responsible for establishing and maintaining internal financial controls based on the internal control over financial reporting criteria established by the company considering the essential components of internal control stated in the Guidance Note on Audit of Internal Financial Controls over Financial Reporting issued by the Institute of Chartered Accountants of India ('ICAI'). These responsibilities include the design, implementation and maintenance of adequate internal financial controls that were operating effectively for ensuring the orderly and efficient conduct of its business, including adherence to company's policies, the safeguarding of its assets, the prevention and detection of frauds and errors, the accuracy and completeness of the accounting records, and the timely preparation of reliable financial information, as required under the Companies Act, 2013.

#### **Auditors' Responsibility**

Our responsibility is to express an opinion on the company's internal financial controls over financial reporting based on our audit. We conducted our audit in accordance with the Guidance Note on Audit of Internal Financial Controls over Financial Reporting (the "Guidance Note") and the Standards on Auditing, issued by ICAI and deemed to be prescribed under section 143(10) of the Companies Act, 2013, to the extent applicable to an audit of internal financial controls, both applicable to an audit of Internal Financial Controls and, both issued by the Institute of Chartered Accountants of India. Those Standards and the Guidance Note require that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance about whether adequate internal financial controls over financial reporting was established and maintained and if such controls operated effectively in all material respects.

Our audit involves performing procedures to obtain audit evidence about the adequacy of the internal financial controls system over financial reporting and their operating effectiveness. Our audit of internal financial controls over financial reporting included obtaining an understanding of internal financial controls over financial reporting, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion on the Company's internal financial controls system over financial reporting.

#### **Meaning of Internal Financial Controls over Financial Reporting**

A company's internal financial control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal financial control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorisations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorised acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

## **Inherent Limitations of Internal Financial Controls Over Financial Reporting**

Because of the inherent limitations of internal financial controls over financial reporting, including the possibility of collusion or improper management override of controls, material misstatements due to error or fraud may occur and not be detected. Also, projections of any evaluation of the internal financial controls over financial reporting to future periods are subject to the risk that the internal financial control over financial reporting may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

### **Opinion**

In our opinion, the company has, in all material respects, an adequate internal financial controls system over financial reporting and such internal financial controls over financial reporting were operating effectively as at 31<sup>st</sup> March 2017, based on the internal control over financial reporting criteria established by the company considering the essential components of internal control stated in the Guidance Note on Audit of Internal Financial Controls Over Financial Reporting issued by the Institute of Chartered Accountants of India.

## 2. Significant Accounting Policies

### 2.1 Statement of Compliance

The Financial Statements have been prepared in accordance with Indian Accounting Standards (Ind As) notified under the Companies (Indian Accounting Standards) Rules, 2015. The company has adopted Indian Accounting Standards from April 1, 2016 and accordingly, these standalone financial statements have been prepared in accordance with Ind ASs notified by section 133 of the Companies Act, 2013 read with relevant rules issued there under from time to time, to the extent applicable to the company. Accordingly, the date transition to Ind AS for the company is April 1, 2015.

There is a possibility that these standalone financial statements and comparatives may require adjustment due to changes in financial reporting requirements arising from new or revised standards or interpretations issued by MCA or ICAI.

### 2.2 Basis of preparation of financial statements

These financial statements are prepared in accordance with Indian Accounting Standards (IND AS) under the historical cost convention on the accrual basis except for certain financial instruments which are measured at fair values; the provisions of the Companies Act, 2013 ('Act') (to the extent notified and applicable); and guidelines issued by the Securities and Exchange Board of India (SEBI). The IND AS are prescribed under Section 133 of the Act read with Rule 3 of the Companies (Indian Accounting Standards) Rules, 2015 and Companies (Indian Accounting Standards) Amendment Rules, 2016.

The company has adopted all notified Indian Accounting standards to the extent applicable. The adoption was carried out in accordance with IND AS 101 (First time adoption of Indian Accounting Standards). The transition was carried out from Indian Accounting Principles generally accepted in India as prescribed under Section 133 of the Act, read with Rule 7 of the Companies (Accounts) Rules, 2014 (IGAAP), which was the previous GAAP. Reconciliations and descriptions of the effect of the transition has been summarized in notes.

Accounting policies have been consistently applied except where a newly issued Indian accounting standard is initially adopted or a revision to an existing accounting standard requires a change in the accounting policy hitherto in use.

### 2.3 Use of estimates

The preparation of the financial statements in conformity with Ind AS requires management to make estimates, judgments and assumptions. These estimates, judgments and assumptions affect the application of accounting policies and the reported amounts of assets and liabilities, the disclosures of contingent assets and liabilities at the date of the financial statements and reported amounts of revenues and expenses during the period. Appropriate changes in estimates are made as management becomes aware of changes in circumstances surrounding the estimates. Changes in estimates are reflected in the financial statements in the period in which changes are made and, if material, their effects are disclosed in the notes to the financial statements.

#### 2.3.1 Useful lives of property, plant and equipment

The company reviews the useful life of property, plant and equipment at the end of each reporting period or more frequently. This reassessment may result in change in depreciation expense in future periods.

### **2.3.2 Valuation of deferred tax assets / liabilities**

The company reviews the carrying amount of deferred tax assets / liabilities at the end of each reporting period.

### **2.3.3 Provisions and contingent liabilities**

A provision is recognised when the company has a present obligation as a result of past event and it is probable that an outflow of resources will be required to settle the obligation, in respect of which a reliable estimate can be made. Provisions (excluding retirement benefits and compensated absences) are not discounted to its present value and are determined based on best estimate required to settle the obligation at the balance sheet date. These are reviewed at each balance sheet date adjusted to reflect the current best estimates. Contingent liabilities are not recognised in the financial statements. A contingent asset is neither recognised nor disclosed in the financial statements.

## **2.4 Revenue Recognition**

Revenue is measured at fair value of the consideration received or receivable. Amounts disclosed as revenue are inclusive of excise duty and net of returns, trade allowances, rebates, value added taxes and amounts collected on behalf of third parties.

Revenue is recognised to the extent that it is probable that the economic benefits will flow to the company and the revenue can be reliably measured regardless of when the payment is being made. The company bases its estimates on historical results, taking into consideration the type of customer, the type of transaction and the specifics of each arrangement.

- All Expenses and income are accounted on accrual basis.

## **2.5 Employee benefits**

- **Long - Term Employee Benefits**

The liability for gratuity & leave encashment is determined using Projected Unit Credit [PUC] Method and is accounted for on the basis of actuarial valuation in Accordance with Ind AS - 19. The company recognizes the net obligation of a defined benefit plan in its balance sheet as an asset or liability. Actuarial Gains and losses through re-measurements of the net defined benefit liability/ (asset) are recognized in other comprehensive income. The current service cost is included in the employee benefit expense in the statement of profit & loss account. The interest cost calculated by applying the discount rate to the net balance of defined benefit obligation, is included in the finance cost in the statement of profit & loss account.

- **Short-Term Employee Benefits**

Short- term employee benefits include performance incentive, salaries & wages, bonus and leave travel allowance. The undiscounted amount of short-term employee benefits expected to be paid in exchange for the services rendered by employees are recognized during the year when the employees render the services.

## **2.6 Borrowing costs**

Borrowing costs consist of interest and other costs that an entity incurs in connection with the borrowing of funds. Borrowing costs also includes exchange differences to the extent regarded as an adjustment to the interest costs. Borrowing costs directly attributable to the acquisition, construction or production of an asset that necessarily takes a substantial period of time to get ready for its intended use are capitalised as part of the cost of the asset.

Processing fee paid for borrowings is amortised over the term of long term loan through statement of profit & loss. All other borrowing costs are expensed in the period in which they occur.

Preference Shares are separated into equity and liability components based on the terms of the issue/ contract. Interest on liability component of preference shares is determined using amortised cost method and is charged to the statement of profit & loss.

## **2.7 Depreciation & amortisation**

The company depreciates property, plant and equipment over their estimated useful lives using the straight-line method. Depreciation methods, useful lives and residual values are reviewed at each reporting period. Depreciation on additions/deductions to property, plant and equipment is provided on pro-rata basis from the date of actual installation or up to the date of such sale or disposal, as the case may be.

Leasehold assets are amortised equally over the period of their lease.

## **2.8 Impairment of Assets**

### ***i) Financial assets (other than at fair value)***

The company assesses at each balance sheet date whether a financial asset or a group of financial assets is impaired. Ind AS 109 requires expected credit losses to be measured through a loss allowance. The company recognises lifetime expected losses for all contract assets and/or all trade receivables that do not constitute a financing transaction.

### ***(i) Non-financial assets***

#### ***a) Property, Plant & equipment and Intangible Assets***

Property, plant and equipment and intangible assets with finite life are evaluated for recoverability whenever there is an indication that their carrying amounts may not be recoverable. If any such indication exists, the recoverable amount (i.e. higher of the fair value less cost to sell and the value-in-use) is determined on an individual asset basis unless the asset does not generate cash flows that are largely independent of those from other assets. In such cases, the recoverable amount is determined for the cash generating unit (CGU) to which the asset belongs. If the recoverable amount of an asset (or CGU) is estimated to be less than its carrying amount, the carrying amount of the asset (or CGU) is reduced to its recoverable amount. An impairment loss is recognised in the statement of profit or loss.

#### ***b) Investment in subsidiaries***

Investment held by the company as on the date of transition date i.e. 01.04.2015 is valued at cost. Investments made in subsidiaries, after the transition date, have been valued at Fair Value Through Other Comprehensive Income [FVTOCI].

#### ***c) Investment in associates / Joint Ventures***

Investment held by the company in associates / joint ventures as on the date of transition date i.e. 01.04.2015 is valued at cost. Investments made in associates / joint ventures, after the transition date, have been valued at Fair Value through Other Comprehensive Income [FVTOCI].

#### ***d) Investment - Others***

##### ***Current Investments***

Quoted financial assets have been classified as FVTOCI and unquoted financial assets have been classified as Fair Value through Profit & Loss [FVTPL].

##### ***Non-Current Investments***

Quoted long term investments have been classified as FVTOCI and unquoted long term investments are have been classified as FVTPL.

## **2.9 Income taxes**

Income tax expense comprises current and deferred income tax. Income tax expense is recognized in net profit in the statement of profit and loss except to the extent that it relates to items recognized directly in equity, in which case it is recognized in other comprehensive income.

Deferred income tax assets and liabilities are recognized for all temporary differences arising between the tax bases of assets and liabilities and their carrying amounts in the financial statements. Deferred tax assets are reviewed at each reporting date and are reduced to the extent that it is no longer probable that the related tax benefit will be realized.

The company offsets current tax assets and current tax liabilities, where it has a legally enforceable right to set off the recognized amounts and where it intends either to settle on a net basis, or to realize the asset and settle the liability simultaneously.

Minimum Alternative Tax [MAT] paid in accordance with the tax laws, which gives rise to future economic benefits in the form of adjustment of future income tax liability, is considered as an asset if there is convincing evidence that the company will pay normal income tax in future periods. Accordingly, MAT is recognised as an asset in the balance sheet when it is probable that future economic benefits associated with it flow to the company and the asset can be measured reliably.

## **2.10 Property, plant and equipment**

Property, plant and equipment are stated at cost, less accumulated depreciation /amortization and impairment, if any. Costs directly attributable to acquisition are capitalized until the property, plant and equipment are ready for use, as intended by management. The cost of property, plant & equipment also includes initial estimates of dismantling cost and restoring the site to its original position, on

which the site is located. For transition to Ind AS, the company has elected to continue with net carrying value of all its property, plant and equipment recognized as on 01.04.2015 measured as per the previous GAAP in accordance with the principles of Part B of Schedule II of the Companies Act, 2013.

### **2.11 Financial instruments**

The company recognizes financial assets and financial liabilities when it becomes a party to the contractual provisions of the instrument. All financial assets (Except Net Investments) and financial liabilities (Except Borrowings) are recognized at fair value on initial recognition, except for trade receivables and security deposits, which are initially measured at transaction price. Transaction costs that are directly attributable to the acquisition or issue of financial assets and financial liabilities that are not at fair value through profit or loss are added to the fair value on initial recognition.

Financial liabilities are subsequently carried at amortized cost using the effective interest method, except for contingent consideration recognized in a business combination, which is subsequently measured at fair value through profit and loss.

For trade and other payables maturing within one year from the balance sheet date, the carrying amounts are approximately at fair value due to the short maturity of these instruments.

### **De-recognition of financial instruments**

The company de-recognises a financial asset when the contractual rights to the cash flows from the financial asset expire or it transfers the financial asset and the transfer qualifies for de-recognition under IND AS 109. A financial liability (or a part of a financial liability) is de-recognised from the company's balance sheet when the obligation specified in the contract is discharged or cancelled or expires.

### **2.12 Borrowings**

Borrowings are initially measured at fair value, net of transaction costs incurred. Borrowings are subsequently measured at amortised cost. Any difference between the proceeds (net of transaction costs) and the redemption amount is recognised in profit or loss over the period of the borrowings using the effective interest method.

Preference shares are separated into liability and equity components based on the terms of the issue / contract. On issuance of the preference shares, the fair value of the liability component is determined using a market rate for an equivalent instrument. This amount is classified as financial liability and is measured at amortised cost (net of transaction costs) until it is extinguished on conversion or redemption. The remainder of the proceeds is recognised and included in equity. Transaction costs are deducted from equity, net of associated income tax. The carrying amount of the equity component is not re-measured in subsequent years.

### **2.13 Investments**

#### **a) Investment in subsidiaries**

Investment held by the company in subsidiaries as on the date of transition date i.e. 01.04.2015 is valued at cost. Investments made in subsidiaries, after the transition date, have been valued at Fair Value through Other Comprehensive Income [FVTOCI].

#### **b) Investment in associates / Joint Ventures**

Investment held by the company in associates / joint ventures as on the date of transition date i.e. 01.04.2015 is valued at cost. Investments made in associates/ joint ventures, after the transition date, have been valued at Fair Value through Other Comprehensive Income [FVTOCI].

#### **c) Investment - Others**

#### **Current Investments**

Quoted financial assets have been classified as FVTOCI and unquoted financial assets have been classified as Fair Value Through Profit & Loss [FVTPL].

#### **Non-Current Investments**

Quoted long term investments have been classified as FVTOCI and unquoted long term investments are have been classified as FVTPL.

### **2.14 Provisions**

A provision is recognized if, as a result of a past event, the company has a present legal or constructive obligation that is reasonably estimable, and it is probable that an outflow of economic benefits will be required to settle the obligation. Provisions are determined by discounting the

expected future cash flows at a pre-tax rate that reflects current market assessments of the time value of money and the risks specific to the liability.

### **2.15 Inventories**

- Raw Materials and Goods under process are valued at cost (Net of provision for diminution) or \*Net Realizable value, whichever is lower.
- Waste and Scrap is valued at Net Realizable Value.
- Cost of inventories of Raw Materials and stores and Spares is ascertained on FIFO basis.
- Cost of goods under process comprise of cost of materials and proportionate production overhead. Cost of material for this purpose is ascertained on FIFO basis.
- Provision for obsolescence in inventories is made, whenever required.
- \*Net Realizable Value is the estimated selling price in the ordinary course of business less any applicable selling expenses.

### **2.16 Earnings per equity share**

Basic earnings per equity share is computed by dividing the net profit attributable to the equity holders of the company by the weighted average number of equity shares outstanding during the period. Diluted earnings per equity share is computed by dividing the net profit attributable to the equity holders of the company by the weighted average number of equity shares considered for deriving basic earnings per equity share and also the weighted average number of equity shares that could have been issued upon conversion of all dilutive potential equity shares. The dilutive potential equity shares are adjusted for the proceeds receivable had the equity shares been actually issued at fair value (i.e. the average market value of the outstanding equity shares). Dilutive potential equity shares are deemed converted as of the beginning of the period, unless issued at a later date. Dilutive potential equity shares are determined independently for each period presented. The number of equity shares and potentially dilutive equity shares are adjusted retrospectively for all periods presented for any share splits and bonus shares issues including for changes effected prior to the approval of the financial statements by the Board of Directors.

### **2.17 Excise Duty**

Excise Duty is paid on clearance of goods but is accounted for in the books on accrual basis. Accordingly, provision for excise duty is made for goods lying in the Bonded Warehouse.

### **2.18 Cash and Cash Equivalents**

Cash and cash equivalents comprise cash on hand and demand deposits, together with other short term, highly liquid investments that are readily convertible into known amounts of cash and which are subject to an insignificant risk of changes in value.

### **2.19 Cash Flow Statement**

- Cash flows are reported using the indirect method, except in case of dividend which has been considered on the basis of actual movement of cash with corresponding adjustments of assets and liabilities and where by profit for the period is adjusted for the effects of transactions of a non-cash nature, any deferrals or accruals of past or future operating cash receipts or payments and items of income or expenses associated with investing or financing cash flows. The cash flows from operating, investing and financing activities of the Company are segregated.

### **2.20 Dividends**

- Final dividends on shares are recorded as a liability on the date of approval by the shareholders and interim dividends are recorded as a liability on the date of declaration by the Company's Board of Directors.

### **2.21 Leases**

- Leases under which the company assumes substantially all the risks and rewards of ownership are classified as finance leases. When acquired, such assets are capitalized at fair value or present value of the minimum lease payments at the inception of the lease, whichever is lower.
- Lease payments under operating leases are recognized as an expense on a straight line basis in net profit in the Statement of Profit and Loss over the lease term. Where the rentals are structured solely to increase in line with expected general inflation to compensate for the lessor's expected inflationary cost increases, such increases are recognized in the year in which such benefits accrue.

The Previous period figures have been regrouped/re-classified, wherever considered necessary to conform to the current year presentation.

## **Independent Auditors' Report**

### **To the Members of OCL Iron and Steel Limited Report on the Consolidated Ind AS financial statements**

We have audited the accompanying consolidated Ind AS financial statements of OCL Iron and Steel Limited ("the holding company") and its subsidiaries (collectively referred to as "the Group"), comprising the consolidated balance sheet as at 31st March 2017, the consolidated statement of profit and loss [including other comprehensive income], the consolidated cash flow statement and the consolidated statement of changes in equity for the year ended on that date, and a summary of the significant accounting policies and other explanatory information (hereinafter referred to as "the consolidated Ind AS financial statements").

### **Management's Responsibility for the Consolidated Ind AS financial statements**

The Holding Company's board of directors is responsible for the preparation of these consolidated Ind AS financial statements in terms of the requirements of the Companies Act, 2013 ("the Act") that give a true and fair view of the consolidated financial position, consolidated financial performance [including other comprehensive income], the consolidated changes in equity and the consolidated cash flows of the Group in accordance with the accounting principles generally accepted in India, including the Indian accounting standards prescribed under Section 133 of the Companies Act, 2013 (hereinafter referred to as "the Act") read with relevant Rules of the Companies (Accounts) Rules, 2014. The respective board of directors of the companies included in the Group are responsible for maintenance of adequate accounting records in accordance with the provisions of the 'Act' for safeguarding of the assets of the Group and for preventing and detecting frauds and other irregularities; the selection and application of appropriate accounting policies; making judgments and estimates that are reasonable and prudent; and the design, implementation and maintenance of adequate internal financial controls, that were operating effectively for ensuring the accuracy and completeness of the accounting records, relevant to the preparation and presentation of the consolidated Ind AS financial statements that give a true and fair view and are free from material misstatement, whether due to fraud or error, which have been used for the purpose of preparation of the consolidated Ind AS financial statements by the directors of the Holding Company, as aforesaid.

### **Auditors' Responsibility**

Our responsibility is to express an opinion on these consolidated Ind AS financial statements based on our audit. While conducting the audit, we have taken into account the provisions of the Act, the accounting and auditing standards and the matters which are required to be included in the audit report under the provisions of the Act and the Rules made there under.

We conducted our audit in accordance with the standards on auditing specified under section 143(10) of the Act. Those standards require that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance about whether the consolidated Ind AS financial statements are free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and the disclosures in the consolidated Ind AS financial statements. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement of the consolidated Ind AS financial statements, whether due to fraud or error. In making those risk assessments, the auditor considers internal financial control relevant to the Holding Company's preparation of the consolidated Ind AS financial statements that give a true and fair view in order to design audit procedures that are appropriate in the circumstances. An audit also includes evaluating the appropriateness of the accounting policies used and the reasonableness of the accounting estimates made by the Holding Company's board of directors, as well as evaluating the overall presentation of the consolidated Ind AS financial statements.

We believe that the audit evidence obtained by us and the audit evidence obtained by the other auditors in terms of their reports referred to in other matters paragraph below, is sufficient and appropriate to provide a basis for our audit opinion on the consolidated Ind AS financial statements.

## Opinion

In our opinion and to the best of our information and according to the explanations given to us and based on the consideration of reports of other auditors on separate financial statements of certain subsidiary companies referred to in the 'Other Matter' below, the aforesaid consolidated Ind AS financial statements give the information required by the Act in the manner so required and give a true and fair view in conformity with the accounting principles generally accepted in India, of the consolidated financial position of the Group as at March 31, 2017, and its consolidated financial performance [including other comprehensive income], its consolidated statement of changes in equity and its consolidated cash flows for the year ended on that date.

## Other Matter

We have not audited the Ind AS financial statements / financial information of one subsidiary company included in the consolidated Ind AS financial statements, whose Ind AS financial statements reflect total assets of Rs. 20.27 Lakh as on 31<sup>st</sup> March, 2017, total net assets of Rs. 0.43 Lakh as on 31<sup>st</sup> March 2017, total revenues of Rs. NIL for the year ended March 31, 2017 and net cash flows of Rs. 0.01 Lakh for the year ended on that date, as considered in the consolidated Ind AS financial statements. These financial statements have been audited by other auditors whose reports have been furnished to us by management and our opinion on the consolidated Ind AS financial statements, in so far as it relates to the amounts and disclosures included in respect of the subsidiary and our report, in terms of sub-sections (3) of Section 143 of the Act, in so far as it relates to the aforesaid subsidiary is based solely on the reports of the other auditors.

Our opinion on the consolidated Ind AS financial statements, and our report on Other Legal and Regulatory Requirements below, is not modified in respect of the above matters with respect to our reliance on the work done and the reports of the other auditors.

## Report on Other Legal and Regulatory Requirements

1. As required by sub-section 3 of Section 143 of the Act, based on our audit and on the consideration of the report of other auditors on separate financial statements and the other financial information of the subsidiaries Companies, as noted in 'Other Matter' paragraph above, we report, to the extent applicable, that:
  - (a) We have sought and obtained all the information and explanations which to the best of our knowledge and belief were necessary for the purposes of our audit of the aforesaid consolidated Ind AS financial statements.
  - (b) In our opinion, proper books of accounts relating to preparation of the aforesaid consolidated Ind AS financial statements as required by law have been kept so far as it appears from our examination of those books and the reports of the other auditors.
  - (c) The consolidated balance sheet, the consolidated statement of profit and loss [including other comprehensive income], consolidated cash flow and the consolidated statement of changes in equity dealt with by this report are in agreement with the relevant books of account maintained for the purpose of preparation of the consolidated Ind AS financial statements.
  - (d) In our opinion, consolidated Ind AS financial statements comply with the Indian Accounting Standards prescribed under Section 133 of the Act, read with Rule 7 of the Companies (Accounts) Rules, 2014.
  - (e) On the basis of the written representations received from the directors of the holding company as on 31 March 2017 taken on record by the board of directors of the holding company and the reports of the other statutory auditors of its subsidiary companies incorporated in India, none of the directors of the Group companies incorporated in India is disqualified as on 31<sup>st</sup> March 2017 from being appointed as a director of that company in terms of sub-section 2 of Section 164 of the Act.
  - (f) with respect to the adequacy of the internal financial controls over financial reporting of the holding company and its subsidiary companies incorporated in India and the operating effectiveness of such controls, refer to our separate report in "Annexure A"; and

- (g) with respect to the other matters to be included in the Auditor's Report in accordance with Rule 11 of the Companies (Audit and Auditors) Rules, 2014, in our opinion and to the best of our information and according to the explanations given to us and based on the consideration of the report of the other auditors on separate financial statements of subsidiaries, as noted in the 'Other Matter' paragraph:
- i. The consolidated Ind AS financial statements disclose the impact of pending litigations on the consolidated financial position of the Group. [Refer Note no. 38.1 to the consolidated Ind AS financial statements];
  - ii. The Group did not have any material foreseeable losses on long term contracts including derivatives contracts.
  - iii. There were no amounts which were required to be transferred, to the Investor Education and Protection Fund by the holding company and subsidiary companies incorporated in India.
  - iv. The requisite disclosures in the consolidated Ind AS financial statements for holdings as well as dealings in Specified Bank Notes during the period from 8 November 2016 to 30 December 2016 have been provided with respect to Holding Company and subsidiaries incorporated in India. Based on audit procedures and reliance on management representation, we report that the disclosures are in accordance with books of account and other records maintained by the Holding Company and subsidiaries incorporated in India and as produced to us by the Management of the Holding Company- Refer Note 14.1 to the consolidated Ind AS financial statements

## **Annexure - A to the Independent Auditors' Report**

### **Report on the Internal Financial Controls over financial reporting under Clause (i) of Sub-section 3 of Section 143 of the Companies Act, 2013 ("the Act")**

In conjunction with our audit of the consolidated Ind AS financial statements of OCL Iron and Steel Limited [the Holding Company] as of and for the year ended March 31, 2017, we have audited the internal financial controls over financial reporting of OCL Iron and Steel Limited ("the holding company"), its subsidiary companies incorporated in India, as of that date.

#### **Management's Responsibility for Internal Financial Controls**

The respective board of directors of the holding company, its subsidiary companies incorporated in India, are responsible for establishing and maintaining internal financial controls based on the internal control over financial reporting criteria established by the company considering the essential components of internal control stated in the Guidance Note on Audit of Internal Financial Controls over Financial Reporting issued by the Institute of Chartered Accountants of India ("ICAI"). These responsibilities include the design, implementation and maintenance of adequate internal financial controls that were operating effectively for ensuring the orderly and efficient conduct of its business, including adherence to company's policies, the safeguarding of its assets, the prevention and detection of frauds and errors, the accuracy and completeness of the accounting records, and timely preparation of reliable financial information, as required under the Companies Act, 2013.

#### **Auditors' Responsibility**

Our responsibility is to express an opinion on the company's internal financial controls over financial reporting based on our audit. We conducted our audit in accordance with the Guidance Note on Audit of Internal Financial Controls over Financial Reporting (the "Guidance Note") issued by ICAI and the Standards on Auditing, issued by ICAI and deemed to be prescribed under section 143(10) of the Companies Act, 2013, to the extent applicable to an audit of internal financial controls, both issued by the Institute of Chartered Accountants of India. Those Standards and the Guidance Note require that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance about whether adequate internal financial controls over financial reporting was established and maintained and if such controls operated effectively in all material respects.

Our audit involves performing procedures to obtain audit evidence about the adequacy of the internal financial controls system over financial reporting and their operating effectiveness. Our audit of internal financial controls over financial reporting included obtaining an understanding of internal financial controls over financial reporting, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement of the Ind AS financial statements, whether due to fraud or error.

We believe that the audit evidence we have obtained and the audit evidence obtained by other auditors in terms of their reports referred to in Other Matters paragraph below is sufficient and appropriate to provide a basis for our audit opinion on the holding company's internal financial controls system over financial reporting.

#### **Meaning of Internal Financial Controls over Financial Reporting**

A company's internal financial control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal financial control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with

authorisations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorised acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

### **Inherent Limitations of Internal Financial Controls Over Financial Reporting**

Because of the inherent limitations of internal financial controls over financial reporting, including the possibility of collusion or improper management override of controls, material misstatements due to error or fraud may occur and may not be detected. Also, projections of any evaluation of the internal financial controls over financial reporting to future periods are subject to the risk that the internal financial control over financial reporting may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

### **Opinion**

In our opinion and to the best of our information and according to the explanation given to us and based on consideration of reporting of other auditors as mentioned in "Other Matters" paragraph of Audit Opinion, the holding company, its subsidiaries, associate companies and joint venture companies, which are incorporated in India, have, in all material respects, an adequate internal financial controls system over financial reporting and such internal financial controls over financial reporting were operating effectively as at March 31, 2017, based on the internal control over financial reporting criteria established by the holding company considering the essential components of internal control stated in the Guidance Note on Audit of Internal Financial Controls Over Financial Reporting issued by the ICAI.

### **Other Matters**

Our aforesaid report under section 143(3)(i) of the Companies Act, 2013 on the adequacy and operating effectiveness of the internal financial controls over financial reporting in so far as it relates to One subsidiary Company which is incorporated in India, is based on the corresponding reports of the auditor of such Company incorporated in India.

## **Notes to the Consolidated Financial Statements**

### **1. Company Overview**

M/s OCL Iron and Steel Limited ("the company") and its subsidiaries (collectively referred to as "the Group") have engaged in Coal Mining, Generation of Power, manufacturing of Sponge Iron, Steel billets, Manufacturing activities and other financial activities.

The Company is a public limited company incorporated in India. The address of its registered office is Village- Lamloi, P.O. Garvana, Rajgangpur District Sundergarh, Orissa-770017. As at March 31, 2017, Garima Buildprop Private Limited, the holding company owned 68.39% of the Company's equity share capital.

The consolidated financial statements for the year ended March 31, 2017 were approved by Board of Directors and authorized for issue on May 29, 2017.

### **2. Significant Accounting Policies**

#### **2.1 Statement of Compliance**

The Consolidated Financial Statements have been prepared in accordance with IND ASs notified under the Companies (Indian Accounting Standard) Rules, 2015. The Group has adopted Indian Accounting Standards from April 1, 2016 and accordingly these consolidated financial statements have been prepared in accordance with Ind ASs notified by section 133 of the Companies Act, 2013 read with relevant rules issued there under from time to time, to the extent applicable to the company. Accordingly, the transition date to Ind AS for the company is April 1, 2015.

There is a possibility that these consolidated financial statements and comparatives may require adjustment due to changes in financial reporting requirements arising from new or revised standards or interpretations issued by MCA or ICAI.

#### **2.2 Basis of preparation of consolidated financial statements**

These financial statements are prepared in accordance with Indian Accounting Standards (Ind AS) under the historical cost convention on the accrual basis except for certain financial instruments which are measured at fair values; the provisions of the Companies Act, 2013 ('Act') (to the extent notified and applicable); and guidelines issued by the Securities and Exchange Board of India (SEBI). The Ind ASs are prescribed under Section 133 of the Act read with Rule 3 of the Companies (Indian Accounting Standards) Rules, 2015 and Companies (Indian Accounting Standards) Amendment Rules, 2016.

The group has adopted all notified Indian Accounting standards to the extent applicable. The adoption was carried out in accordance with Ind AS 101 (First time adoption of Indian Accounting Standards). The transition was carried out from Indian Accounting Principles generally accepted in India as prescribed under Section 133 of the Act, read with Rule 7 of the Companies (Accounts) Rules, 2014 (IGAAP), which was the previous GAAP. Reconciliations and descriptions of the effect of the transition has been summarized in notes.

Accounting policies have been consistently applied except where a newly issued Indian accounting standard is initially adopted or a revision to an existing accounting standard requires a change in the accounting policy hitherto in use. Further the consolidated financial statements have been prepared using uniform accounting policies for like transactions and other events in similar circumstances except for items, for which the accounting treatment is given on the basis of local laws applicable in respective countries for which using uniform accounting policies for the purpose of consolidation is impracticable.

#### **2.3 Use of estimates**

The preparation of the consolidated financial statements in conformity with Ind AS requires management to make estimates, judgments and assumptions. These estimates, judgments and assumptions affect the application of accounting policies and the reported amounts of assets and liabilities, the disclosures of contingent assets and liabilities at the date of the consolidated financial statements and reported amounts of revenues and expenses during the period. Appropriate changes in estimates are made as management becomes aware of changes in

circumstances surrounding the estimates. Changes in estimates are reflected in the consolidated financial statements in the period in which changes are made and, if material, their effects are disclosed in the notes to the financial statements.

### **2.3.1 Useful lives of property, plant and equipment**

The group reviews the useful life of property, plant and equipment at the end of each reporting period or more frequently. This reassessment may result in change in depreciation expense in future periods.

### **2.3.2 Valuation of deferred tax assets / liabilities**

The group reviews the carrying amount of deferred tax assets / liabilities at the end of each reporting period. The policy for the same has been explained under Note 2.11

### **2.3.3 Provisions and contingent liabilities**

A provision is recognised when the company has a present obligation as a result of past event and it is probable than an outflow of resources will be required to settle the obligation, in respect of which a reliable estimate can be made. Provisions (excluding retirement benefits and compensated absences) are not discounted to its present value and are determined based on best estimate required to settle the obligation at the balance sheet date. These are reviewed at each balance sheet date adjusted to reflect the current best estimates. Contingent liabilities are not recognised in the consolidated financial statements. A contingent asset is neither recognised nor disclosed in the consolidated financial statements.

## **2.4 Principles of Consolidation and Equity Accounting**

Consolidated financial statements are the financial statements of the group in which assets, liabilities, equity, income, expenses and cash flows of the parent and its subsidiaries are presented as those of a single economic entity.

### **(i) Subsidiaries**

Subsidiaries are all entities (including structured entities) over which the group has control. The group controls the entity when the group is exposed to, or has rights to, variable returns from its involvement with the entity and has the ability to affect those returns through its power to direct the relevant activities of the entity. Subsidiaries are fully consolidated from the date on which control is transferred to the group. They are deconsolidated from the date, the control seizes.

The group combines the financial statements of the parent and its subsidiaries line by line, adding together like items of assets, liabilities, equity, income and expenses. Inter-company transactions, balances and unrealized gains all transactions between group companies are eliminated. Unrealized losses are also eliminated unless the transaction provides evidence of impairment of the transferred assets. Accounting policies of subsidiaries have been changed wherever considered necessary to ensure consistency with the policies adopted by the group.

Non- controlling interest in the results and equity of subsidiaries are shown separately in the consolidated statement of the profit and loss, consolidated statement of changes in equity and balance sheet respectively.

### **(ii) Associates**

Associates are all entities over which the group has significant influence but does not have control or joint control. This is generally a case where the group holds between 20%-50% of the voting rights. Investments in associates are accounted for using the equity method of accounting after initially being recognized at cost.

### **(iii) Joint Ventures**

Interests in Joint ventures are accounted for using the equity method, after initially being recognized at cost in the consolidated balance sheet.

## **2.5 Foreign currency translations**

### ***(i) Functional and Presentation Currency***

The Group's consolidated financial statements are presented in INR, which is also the parent company's functional currency. For each entity, the Group determines the functional currency and items included in the financial statements of each entity are measured using that functional currency.

### ***(ii) Transactions and balances***

Foreign currency transactions are translated into the functional currency using the exchange rates at the dates of the transactions. Foreign exchange gains and losses resulting from settlement of such transactions and from the translation of monetary assets and liabilities denominated in foreign currencies at year end exchange rates are generally recognized in profit or loss. A monetary item for which settlement is neither planned nor likely to occur in the foreseeable future is considered as part of the entity's net investment in that foreign operation.

### ***(iii) Group Companies***

For the purpose of presenting consolidated financial statements, the assets and liabilities of the Company's foreign operations that have a functional currency other than Indian rupees are translated into Indian rupees using exchange rates prevailing at the reporting date. Income and expense items are translated at the average exchange rates for the period. Exchange differences arising, if any, are recognized in other comprehensive income and held in foreign currency translation reserve (FCTR), a component of equity, except to the extent that the translation difference is allocated to non-controlling interest.

## **2.6 Revenue Recognition**

Revenue is measured at fair value of the consideration received or receivable. Revenue is recognised to the extent that it is probable that the economic benefits will flow to the group and the revenue can be reliably measured regardless of when the payment is being made. The group bases its estimates on historical results, taking into consideration the type of customer, the type of transaction and the specifics of each arrangement.

- All Expenses and income are accounted for on accrual basis.

## **2.7 Employee benefits**

### **• Long - Term Employee Benefits**

The liability for gratuity, leave encashment, pension, superannuation and other benefits is determined using Projected Unit Credit [PUC] Method and is accounted for on the basis of actuarial valuation in Accordance with IND AS - 19. The company recognizes the net obligation of a defined benefit plan in its balance sheet as an asset or liability. Actuarial Gains and losses through re-measurements of the net defined benefit liability/(asset) are recognized in other comprehensive income. The current service cost is included in the employee benefit expense in the statement of profit & loss account. The interest cost calculated by applying the discount rate to the net balance of defined benefit obligation, is included in the finance cost in the statement of profit & loss account.

### **• Short-Term Employee Benefits**

Short - term employee benefits include performance incentive, salaries & wages, bonus and leave travel allowance. The undiscounted amount of short-term employee benefits expected to be paid in exchange for the services rendered by employees are recognized during the year when the employees render the services.

## **2.8 Borrowing costs**

Borrowing costs consist of interest and other costs that an entity incurs in connection with the borrowing of funds. Borrowing cost also includes exchange differences to the extent regarded as an adjustment to the interest costs. Borrowing costs directly attributable to the acquisition, construction or production of an asset that necessarily takes a substantial period of time to get ready for its intended use are capitalised as part of the cost of the asset.

Processing fee paid for borrowings is amortised over the term of long term loan through statement of profit & loss. All other borrowing costs are expensed in the period in which they occur.

Preference Shares are separated into equity and liability components based on the terms of the issue / contract. Interest on liability component of preference shares is determined using amortised cost method and is charged to the statement of profit & loss.

## **2.9 Depreciation & amortisation**

The group depreciates property, plant and equipment over their estimated useful lives using the straight-line method. Depreciation methods, useful lives and residual values are reviewed at each reporting period. Depreciation on additions/deductions to property, plant and equipment is provided on pro-rata basis from the date of actual installation or up to the date of such sale or disposal, as the case may be.

Leasehold assets are amortised equally over the period of their lease.

## **2.10 Impairment of Assets**

### **i) Financial assets (other than at fair value)**

The group assesses at each balance sheet date whether a financial asset or a group of financial assets is impaired. Ind AS 109 requires expected credit losses to be measured through a loss allowance. The group recognises lifetime expected losses for all contract assets and/or all trade receivables that do not constitute a financing transaction.

### **(i) Non-financial assets**

#### **a) Property, Plant & equipment and Intangible Assets**

Property, plant and equipment and intangible assets with finite life are evaluated for recoverability whenever there is an indication that their carrying amounts may not be recoverable. If any such indication exists, the recoverable amount (i.e. higher of the fair value less cost to sell and the value-in-use) is determined on an individual asset basis unless the asset does not generate cash flows that are largely independent of those from other assets. In such cases, the recoverable amount is determined for the cash generating unit (CGU) to which the asset belongs. If the recoverable amount of an asset (or CGU) is estimated to be less than its carrying amount, the carrying amount of the asset (or CGU) is reduced to its recoverable amount. An impairment loss is recognised in the statement of profit or loss.

#### **b) Investment in subsidiaries**

Investment held by the group as on the date of transition date i.e. 01.04.2015 is valued at cost. Investments made in subsidiaries, after the transition date, have been valued at Fair Value through Other Comprehensive Income [FVTOCI].

#### **c) Investment in associates / Joint Ventures**

Investment held by the company in associates / joint ventures as on the date of transition date i.e. 01.04.2015 is valued at cost. Investments made in associates / joint ventures, after the transition date, have been valued at Fair Value through Other Comprehensive Income [FVTOCI].

#### **d) Investment - Others**

##### **Current Investments**

Quoted financial assets have been classified as FVTOCI and unquoted financial assets have been classified as Fair Value Through Profit & Loss [FVTPL].

##### **Non-Current Investments**

Quoted long term investments have been classified as FVTOCI and unquoted long term investments are have been classified as FVTPL.

## **2.11 Non-Current Assets held for sale/ Discontinued Operations/**

The Group classifies non-current assets and disposal groups as held for sale, if their carrying amount is likely to be recovered principally through a sale rather than through continuing use and there is a commitment from the management to sell the above assets within one year from the date of classification. The asset is regarded as held for sale only when the assets or disposal group is available for immediate sale in its present condition, subject only to the terms that are usual and customary for sales and its sale is highly probable and also it will genuinely be sold, not abandoned.

Non current assets held for sale to owners and disposal groups are measured at lower of their carrying amount and the fair value less cost to sell. Assets and liabilities classified as held for sale are presented separately in the balance sheet. Property, plant and equipment and intangible assets held for sale, once classified as held for sale are not further depreciated or amortised. Discontinued operations are excluded from the results of continuing operations and are presented as a single amount as profit or loss after tax from discontinued operations in the statement of profit and loss.

## **2.12 Income taxes**

Income tax expense comprises current and deferred income tax. Income tax expense is recognized in net profit in the statement of profit and loss except to the extent that it relates to items recognized directly in equity, in which case it is recognized in other comprehensive income.

Deferred income tax assets and liabilities are recognized for all temporary differences arising between the tax bases of assets and liabilities and their carrying amounts in the financial statements. Deferred tax assets are reviewed at each reporting date and are reduced to the extent that it is no longer probable that the related tax benefit will be realized.

The group offsets current tax assets and current tax liabilities, where it has a legally enforceable right to set off the recognized amounts and where it intends either to settle on a net basis, or to realize the asset and settle the liability simultaneously.

Minimum Alternative Tax [MAT] paid in accordance with the tax laws, which gives rise to future economic benefits in the form of adjustment of future income tax liability, is considered as an asset if there is convincing evidence that the company will pay normal income tax in future periods. Accordingly, MAT is recognised as an asset in the balance sheet when it is probable that future economic benefits associated with it flow to the company and the asset can be measured reliably.

While preparing consolidated financial statements the accounting treatment for tax is given on the basis of local laws applicable in respective countries.

## **2.13 Property, plant and equipment**

Property, plant and equipment are stated at cost, less accumulated depreciation /amortization (applied as per local laws of respective countries)and impairment, if any. Costs directly attributable to acquisition are capitalized until the property, plant and equipment are ready for use, as intended by management. The cost of property, plant & equipment also includes initial estimates of dismantling cost and restoring the site to its original position, on which the site is located. For transition to IND AS, the company has elected to continue with carrying value of all its property, plant and equipment recognized as on 01.04.2015 measured as per the previous GAAP.

## **2.14 Financial instruments**

The group recognizes financial assets and financial liabilities when it becomes a party to the contractual provisions of the instrument. All financial assets (Except Net Investments) and financial liabilities (Except Borrowings) are recognized at fair value on initial recognition, except for trade receivables and security deposits, which are initially measured at transaction price. Transaction costs that are directly attributable to the acquisition or issue of financial assets and financial liabilities that are not at fair value through profit or loss are added to the fair value on initial recognition.

Financial liabilities are subsequently carried at amortized cost using the effective interest method, except for contingent consideration recognized in a business combination, which is subsequently measured at fair value through profit and loss.

For trade and other payables maturing within one year from the balance sheet date, the carrying amounts are approximately at fair value due to the short maturity of these instruments.

### **De-recognition of financial instruments**

The group de-recognises a financial asset when the contractual rights to the cash flows from the financial asset expire or it transfers the financial asset and the transfer qualifies for de-recognition under IND AS 109. A financial liability (or a part of a financial liability) is de-recognised from the group's balance sheet when the obligation specified in the contract is discharged or cancelled or expires.

### **2.15 Borrowings**

Borrowings are initially measured at fair value, net of transaction costs incurred. Borrowings are subsequently measured at amortised cost. Any difference between the proceeds (net of transaction costs) and the redemption amount is recognised in profit or loss over the period of the borrowings using the effective interest method.

Preference shares are separated into liability and equity components based on the terms of the issue / contract. On issuance of the preference shares, the fair value of the liability component is determined using a market rate for an equivalent instrument. This amount is classified as financial liability and is measured at amortised cost (net of transaction costs) until it is extinguished on conversion or redemption. The remainder of the proceeds is recognised and included in equity. Transaction costs are deducted from equity, net of associated income tax. The carrying amount of the equity component is not re-measured in subsequent years.

### **2.16 Investments**

#### **a) Investment in subsidiaries**

Investment held by the group in subsidiaries as on the date of transition date i.e. 01.04.2015 is valued at cost. Investments made in subsidiaries, after the transition date, have been valued at Fair Value through Other Comprehensive Income [FVTOCI].

#### **b) Investment in associates / Joint Ventures**

Investment held by the group in associates / joint ventures as on the date of transition date i.e. 01.04.2015 is valued at cost. Investments made in associates / joint ventures, after the transition date, have been valued at Fair Value through Other Comprehensive Income [FVTOCI].

#### **c) Investment - Others**

##### **Current Investments**

Quoted financial assets have been classified as FVTOCI and unquoted financial assets have been classified as Fair Value through Profit & Loss [FVTPL].

##### **Non-Current Investments**

Quoted long term investments have been classified as FVTOCI and unquoted long term investments are have been classified as FVTPL.

### **2.17 Provisions**

A provision is recognized if, as a result of a past event, the group has a present legal or constructive obligation that is reasonably estimable, and it is probable that an outflow of economic benefits will be required to settle the obligation. Provisions are determined by discounting the expected future cash flows at a pre-tax rate that reflects current market assessments of the time value of money and the risks specific to the liability.

## **2.18 Inventories**

- Raw Materials and Goods under process are valued at cost (Net of provision for diminution) or \*Net Realizable value, whichever is lower.
- Waste and Scrap is valued at Net Realizable Value.
- Cost of inventories of Raw Materials and stores and Spares is ascertained on FIFO basis.
- Cost of goods under process comprise of cost of materials and proportionate production overhead. Cost of material for this purpose is ascertained on FIFO basis.
- Provision for obsolescence in inventories is made, whenever required.
- \*Net Realizable Value is the estimated selling price in the ordinary course of business less any applicable selling expenses.

## **2.19 Earnings per equity share**

Basic earnings per equity share is computed by dividing the net profit attributable to the equity holders of the company by the weighted average number of equity shares outstanding during the period. Diluted earnings per equity share is computed by dividing the net profit attributable to the equity holders of the company by the weighted average number of equity shares considered for deriving basic earnings per equity share and also the weighted average number of equity shares that could have been issued upon conversion of all dilutive potential equity shares. The dilutive potential equity shares are adjusted for the proceeds receivable had the equity shares been actually issued at fair value (i.e. the average market value of the outstanding equity shares). The number of equity shares and potentially dilutive equity shares are adjusted retrospectively for all periods presented for any share splits and bonus shares issues including for changes effected prior to the approval of the financial statements by the Board of Directors.

## **2.20 Dividends**

Final dividends on shares are recorded as a liability on the date of approval by the shareholders and interim dividends are recorded as a liability on the date of declaration by the company's board of directors.

## **2.21 Leases**

Leases under which the company assumes substantially all the risks and rewards of ownership are classified as finance leases. When acquired, such assets are capitalized at fair value or present value of the minimum lease payments at the inception of the lease, whichever is lower.

Lease payments under operating leases are recognized as an expense on a straight line basis in net profit in the Statement of Profit and Loss over the lease term.

The Previous period figures have been regrouped/re-classified, wherever considered necessary to conform to the current year presentation.
